Flat Panel Drapery Instructions

Getting Started: Please review instructions carefully, before you begin installation.

BEFORE YOU BEGIN

Please note that:

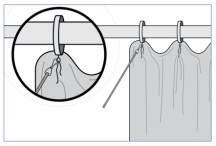

- Drapery pins are pre-installed 7” apart on the back of your drapes. Please check that no pins have detached during shipping.
- Metal drapery pins can be adjusted to raise or lower the drape height as needed.
- The wall hooks are included with your instructions.

Step 1: Unpacking And Sorting Drapes

Unpack all drapes and sort them by window. Pairs of drapes will be labelled “Left” or “Right” on the return sides.

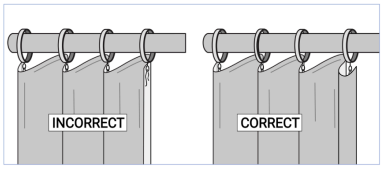

Step 2: Installing Drapes

The outer rings on the rod are placed between the finial and the bracket. Begin installing the drapes from the outer ring first, attach the second-from-last drapery pin to this outer ring, and continue toward the center. Leave the first drapery pin on the outer edge for the wall hook.

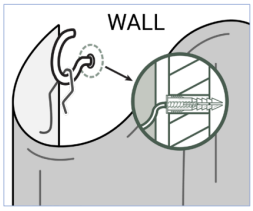

Step 3: Leading Edge Pin

Attach the leading edge drapery pin in the opposite direction, as shown.

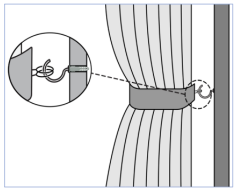

Step 1: Installing the Wall Hooks

Screw the hooks into the wall, at the same height as the drapery pins.

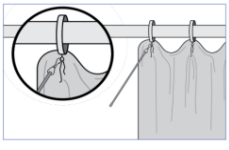

Position each wall hook so that the outermost fold is neatly in place, creating a finished appearance when the drapes are open. Proper placement will also help minimize light gaps between the drapery and the wall, improving light control and privacy.

Step 2: Tieback Installation (If Included)

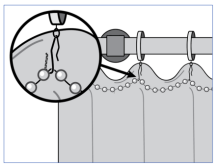

Wrap the tieback around the drape halfway down the panel, then adjust it until you achieve the desired look. Then secure the tieback.

Step 3: Attaching Drapery Wands (If Included)

Attach the wand to the first center leading ring as shown.

Step 4: Stabilizing Drapery Folds

Use the enclosed ball chain to help maintain drapery folds when opening and closing the panels.

- Count the drapery pins on the panel.
- Evenly space and mark the attachment points on the chain, including both ends.
- Hook the chain to the drapery pins at the marked locations.
- Test the drapery to ensure it opens and closes fully. Adjust the chain as needed.

HOW TO DRESS FLAT PANEL DRAPES

Dressing your drapes helps train the fabric to form consistent folds. Lightweight fabrics typically take 2-3 days, while heavier fabrics or interlined drapes may take up to 2 weeks.

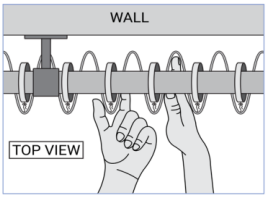

For best results, keep the drapes open during this period and avoid closing them to allow the folds to set properly.

Dressing Flat Panel Video

Step 1: Start Dressing

Start with the outermost ring, as it is secured between the finial and the bracket.

Step 2: Creating Folds

Create a fold around each drapery pin by pinching the fabric at the top of the panel. While holding the fold, run your fingers down the length of the fabric to shape it, keeping the back of the fold facing the wall. Repeat for each drapery pin across the panel.

Step 3: Securing the Folds

Use the included ribbons to gently tie the folds neatly near the drapery pins.

While the top of the drape is secured, shape the folds all the way down to the floor. Tie the drape loosely at the middle and bottom to help maintain the folds from top to bottom. This process encourages the fabric to develop and retain its shape, whether the drapes are open or closed.

Leave the drapes tied for several days to allow the folds to set properly.

DRAPERY CARE

Once the draperies are installed and dressed, most wrinkles and folds will hang out on their own within 1 - 2 weeks. A garment steamer may also be used to help smooth out the wrinkles. Please take care not to overheat the fabric while removing wrinkles. You also can use a wrinkle release spray like Downy© Wrinkle Releaser.

Certain fabrics, like silks or linens, have natural characteristics that steaming will not remove. If the drapes are dusty, simply vacuum over them using an upholstery attachment. For stubborn stains or an overall deep cleaning, we recommend using a professional, on-site cleaning service.
