Pleated Drapery Instructions

Getting Started: Please review instructions carefully, before you begin installation.

Please Note:

The drapery pins and Eurohooks come pre-installed on the back of each pleat. Both can be adjusted to lower or raise the drapery height as needed. Wall hooks, which are included with your instructions, are necessary for creating drapery returns.

Please check that no pins have detached during shipping before hanging the drapes.

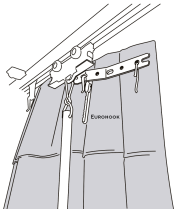

Step 1: Unpacking and Sorting Drapes

Unpack all the drapes and sort them by window.. Pairs of drapes will be labelled “Left” or “Right” on the return sides.

Step 2: Installing Drapes On A Rod

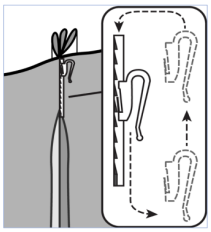

The outer rings sit between the finial and bracket. Attach the second-to-last drapery pin to the outer ring. Then continue hanging the panel toward the center. Leave the outermost pin unattached for the wall hook.

PLEATED DRAPERY INSTALLATION STEPS

Step 1: Insert Eurohook to Drapery Pin To Carrier

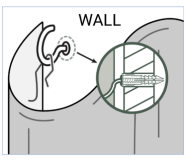

Insert the Eurohook into the 5th hole of the carrier and the drapery pin into the first hole.

Step 2: Adjusting Drapery Pins Height

Adjust the drapery pin position if needed. The Eurohook can be adjusted in ¼” increments. Pull the pin down and reinsert it from the top, until you’ve reached the desired height.

To adjust the metal drapery pins, simply take it out and reinsert it higher or lower, using the original insertion hole as a guide. Be aware of the sharp pin at the end.

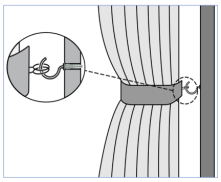

Step 3: Creating Drapery Returns

Screw the hooks into the wall, at the same height as the drapery pins.

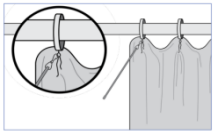

Position each hook so that the outermost fold is neatly in place, creating a finished appearance when the drapes are open. Proper placement will also help minimize light gaps between the drapery and the wall, improving light control and privacy.

Step 4: Installing Tiebacks (If Included)

Wrap the tieback around the drape approximately halfway down the panel, then adjust it until you achieve the desired look. Secure the tieback once you have found the ideal position.

Step 5: Attaching Drapery Wands (If Included)

Attach the wand to the first leading center ring, as shown.

DRESSING & TRAINING DRAPERY FOLDS

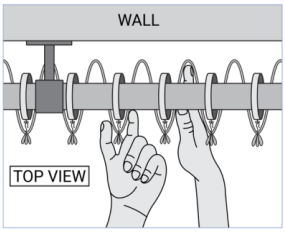

Applies to Pinch Pleat, Tailored Pleat, and Goblet Pleat

Dressing your drapes helps create memory in the fabric, allowing the folds to form consistently each time the drapes are opened or closed. Lighter fabrics typically require 2-3 days to develop memory, while heavier fabrics or drapes with interlining may take up to two weeks. During this period, we recommend keeping the drapes in the open position and avoiding closing them to allow the folds to set properly.

Step 1: Start Dressing your Drapes

Begin with the outermost ring, as it is secured between the finial and the bracket.

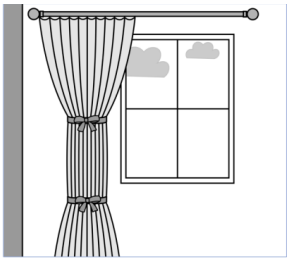

Step 2: Form the Folds

Gently straighten each pleat at the top of the panel so it sits upright and aligned on the rod, ensuring the folds below hang correctly. Using one hand, lightly pull the center of each pleat forward to accent and define it, helping every fold stand out.

To define the folds, run your fingers down each side of the pleat, smoothing the fabric as you go. Continue shaping the folds behind each pleat, working toward the center of the drape.

Step 3: Secure the Folds

Use the included ribbons to gently tie the folds together near the drapery pins.

While the top of the drape is secured, shape the folds all the way down to the floor. Tie the drape loosely at the middle and bottom to help maintain the folds from top to bottom. This process encourages the fabric to develop and retain its shape, whether the drapes are open or closed.

Leave the drapes tied for several days to allow the folds to set properly.

DRAPERY CARE

Once the draperies are installed and dressed, most wrinkles and folds will hang out on their own within 1-2 weeks. A garment steamer may also be used to help smooth out the wrinkles. Please take care not to overheat the fabric while removing wrinkles. You can also use a wrinkle release spray like Downy Wrinkle Releaser.

If the drapes are dusty, simply vacuum over them using an upholstery attachment. For stubborn stains or an overall deep cleaning, we recommend using a professional, on-site cleaning service. Certain fabrics, like silks or linens, have natural characteristics that steaming will not remove.
