Rod Pocket Drapery Instructions

ROD POCKET INSTALLATION STEPS

Please review all instructions before beginning installation. Unpack and sort the drapes by window.

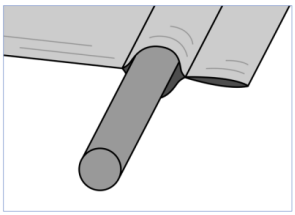

Dressing the drapes helps train the fabric to hold its folds, creating a consistent appearance each time the drapes are opened or closed. For lighter fabrics, this process typically takes 2 to 3 days. Heavier fabrics, or drapes with interlining, may require up to two weeks. During this period, keep the drapes in the open position to allow the folds to set and develop memory.

Step 1: Rod Preparation

Install the hardware according to the provided instructions, leaving one finial detached. Slide the drapes onto the rod, then position the outermost tab of each panel between the bracket and finial. Reattach the finial and secure the rod according to the hardware instructions.

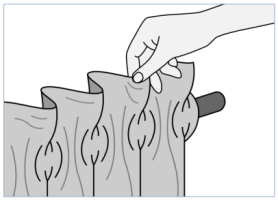

Step 2: Mounting Drapes

Slide drapes onto the rod.

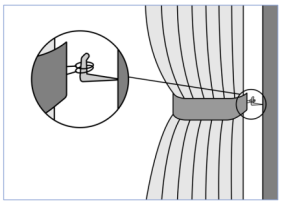

Step 3: Installing Rod

Once the drapes are in place, install the last finial and attach and lock your rod according to the hardware installation instructions.

Step 4: Tiebacks Installation (If Included)

Wrap the tieback around the drape halfway down the panel, then adjust it until you achieve the desired look. Then secure the tiebacks with the wall hooks.

DRAPERY CARE

Once the draperies are installed and dressed, most wrinkles and folds will hang out on their own within 1 - 2 weeks. A garment steamer may also be used to help smooth out the wrinkles. Please take care not to overheat the fabric while removing wrinkles. You also can use a wrinkle release spray like Downy© Wrinkle Releaser.

Certain fabrics, like silks or linens, have natural characteristics that steaming will not remove. If the drapes are dusty, simply vacuum over them using an upholstery attachment. For stubborn stains or an overall deep cleaning, we recommend using a professional, on-site cleaning service.
